

Ayhan Uzundal

Software Engineering Manager / Project Manager / Founder @ Overstein

Istanbul, Turkiye | ayhanuzundal@gmail.com | ayhanuzundal.com.tr | linkedin.com/in/ayhan-uzundal

Software Engineering Manager with 10+ years leading enterprise-scale software delivery across telecom, e-commerce, industrial automation, and mobile platforms. Founder of Overstein, building Super Garage and reusable product infrastructure. Expertise in Agile delivery, CI/CD transformation, AI-assisted validation, and distributed team leadership.

Key Highlights

- Led 20+ engineers across development, QA, and automation in distributed Turkey-China organizations
- Owned USD 8M-scale and EUR 5M-scale delivery programs from roadmap to production release
- Founded Overstein; building Super Garage as first AI-powered mobile product
- Built AI-assisted multilingual validation framework across 11 languages
- Conducted 50+ technical interviews; delivered releases with no major production incidents

Founder & Products

Overstein - Founder

Technology company | Mobile products & reusable app infrastructure

- Founded Overstein to build scalable mobile products with enterprise-grade engineering discipline
- Developing reusable platform: auth, membership, AI services, notifications, localization, analytics
- Combining corporate delivery experience with startup-style product execution

Super Garage - First Product (Overstein)

AI-powered vehicle assistant | Flutter, Firebase, Mobile

- Smart reminders, maintenance tracking, expense management, and marketplace integration
- Live vehicle data and premium mobile user experience
- First consumer product validating Overstein platform vision

Work Experience

Huawei - Software Engineering Manager / Project Manager

Nov 2024 - Present | HarmonyOS Mobile OS New Version Project v6.0-v7.0

- Led 20+ engineers across software development, QA, and automation
- Owned USD 8M-scale multi-regional delivery program from roadmap to production release
- Established KPI/OKR-driven engineering governance
- Built AI-assisted multilingual validation framework across 11 languages
- Reduced manual validation from ~39 hours to a few hours per cycle

Siemens - Software Engineering Tech Lead

Apr 2021 - Nov 2024 | 5G Smart Factory Network Management Platform

- Led 10+ member team across Development, Quality Engineering, and DevOps
- Built CI/CD-integrated pipelines, improving release efficiency by 50%
- Delivered EUR 5M enterprise platform with zero critical production defects at release

Hepsiburada - Senior Software Engineer

Jul 2019 - Apr 2021 | Merchant Platform Transformation

- Contributed to modernization from legacy to microservices architecture
- Designed validation strategies for listing, catalog, and order workflows

Turkcell via Netas - Senior Software Engineer

Sep 2016 - Jul 2019 | BiP & Fizy Platforms

- Contributed to large-scale telecom digital platforms under high traffic

- Supported API and backend engineering initiatives improving release stability

Technical Skills

Engineering: KPI/OKR, Agile, Scrum, Kanban, Release Governance, CI/CD, DevOps
Programming: Java, Python, JavaScript, SQL, REST APIs, Microservices, Flutter
Cloud & DevOps: Docker, Kubernetes, Azure, Huawei Cloud, Google Cloud, Jenkins, GitLab CI
Quality & Automation: Selenium, Appium, Playwright, RestAssured, API Testing
Observability: Grafana, Prometheus, Kibana | Data: PostgreSQL, MongoDB, Redis, Elasticsearch

Education

MBA (2019-2021)
B.Sc. Computer Engineering (2013-2017), GPA: 3.6/4.0

Certifications

PMP, CSPO, PSM I, ISTQB Advanced Test Automation Engineer, ISTQB Foundation Level
TUBITAK Enterprising and Business Management, MUSIAD Businessman and Enterprising
